MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Policy Memorandum, Executive Order 13514, Federal Leadership in Environmental Energy, and Economic Performance; Purchase of Environmentally Preferable Products - Green Procurement Program

1. **Applicability.** This policy statement applies to all civilian personnel at Fort A.P. Hill.
2. **Proponent.** Directorate of Public Works (DPW).
3. **References:**
 - a. Executive Order 13514, Federal Leadership in Environmental, Energy, and Economic Performance, 5 October 2009.
 - b. Memorandum, Department of Defense, Under Secretary of Acquisition, Technology and Logistics, 2 December 08, Subject: Updated Green Procurement Program Strategy.
 - c. Executive Order 13423, Strengthening Federal Energy, and Transportation Management, 24 January 2007.
4. **Policy.** Consideration of a product's "Green" attributes will be standard in procurement actions, consistent with such traditional factors as product safety, price, performance, and availability.
5. Executive Orders 13514 and 13423 require federal agencies to purchase environmentally preferable products and services, and revokes previous Executive Orders (13101 & 13148) related to environmentally preferable purchasing. Green Procurement is the purchase of environmentally preferable products and services. These products are preferred because they conserve resources, create less pollution and waste, or eliminate health and safety risks. (See Enclosure 1).
6. Consideration of environmental preference shall begin early in the acquisition process and be rooted in the ethics of pollution prevention, which strives to eliminate or reduce, up-front, potential risks to human health and the environment.
